Research Interests

My research focuses on fraud and abuse detection, including forensic techniques for Android malware and Ethereum smart contracts, leveraging program analysis and machine learning for behavior modeling. I'm interested in Android security, banking and blockchain security, large-scale malware analysis, privacy leakage discovery, and system design that secures user privacy.

Education

Ph.D. in Computer Science 08/21 - 12/25
Cyber Forensics Innovation Laboratory
Advisor: Professor Brendan Saltaformaggio
Georgia Institute of Technology Atlanta, GA

Master of Science in Computer Engineering 08/19 - 05/21
Georgia Institute of Technology Atlanta, GA

Bachelor of Science with Honors in Computer Engineering 08/15 - 05/19
University of Illinois at Urbana-Champaign Champaign, IL

Work Experience

PhD Software Engineer Intern 05/25 - 08/25
Meta Menlo Park, CA

Security Research Intern 05/24 - 08/24
Bank of America (BofA) Addison, TX

Identified 10K fraud transactions by modeling behaviors of PoC Android malware.
Deployed proactive defense against Android malware in the BofA app by collaborating with development team.
Streamlined BofA's malware response process and improved efficiency by creating a mobile malware defense playbook and operationalizing it with the malware analytics team.
